

VTL SCENIC FLOORS

STAGE AND DANCE FLOORS

27 - EVREUX - Théâtre Legendre

VTI Scenic Floors is a french company specializing in the manufacturing and installation of stage and dance floors.
We design, produce and set up stage and sprung floors in theaters, operas, auditoriums, dance halls and other venues in France and abroad.

We work upstream with theatre consultants, architects and technical directors to suit and accommodate each one's specific demands.

From drawing the initial plans to the completion of the project, we assist, supply technical advice and recommendation for the complete satisfaction of our customers.

EXPERTISE

From our first stage floor in 2006 to our most recent project at the New Comedy in Geneva, VTI Scenic Floors thrive on quality from the very beginning, starting with our carefully selected logs and ending with the successful project hand over.

Our qualified craftsmen and craftswomen are devoted to providing excellence in every detail.

At VTI Scenic Floors, we supply and install solid wood floorboards and panels. We also refurbish existing floors by sanding them, followed by a suitable treatment e.g oiling and/or painting.

A regular maintenance contract will contribute to a longer lasting floor.

We also build acoustic and decorative panels and acoustic shells.

All our wood goes through our vacuum dryer to adapt its dryness to each venue and therefore increasing its stability.

Our supply chain is eco-certified.

The expertise of VTI Scenic Floors is recognized by the french organization Qualibat.

13 - MIRAMAS - Théâtre de la Colonne

HARDWOOD FLOOR

WOODCOTRAD

TECHNICAL FEATURES

Thickness

14-22-27-34mm and more
On demand

Width

On demand

Length

On demand

- Fixed length
- Multiple length
Layout for joints on joist set up

Species

Oak, beech, spruce, yellow cedar,
other hardwood, other softwood,
tropical wood

Straight edge or chamfer

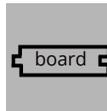

Tongue / groove

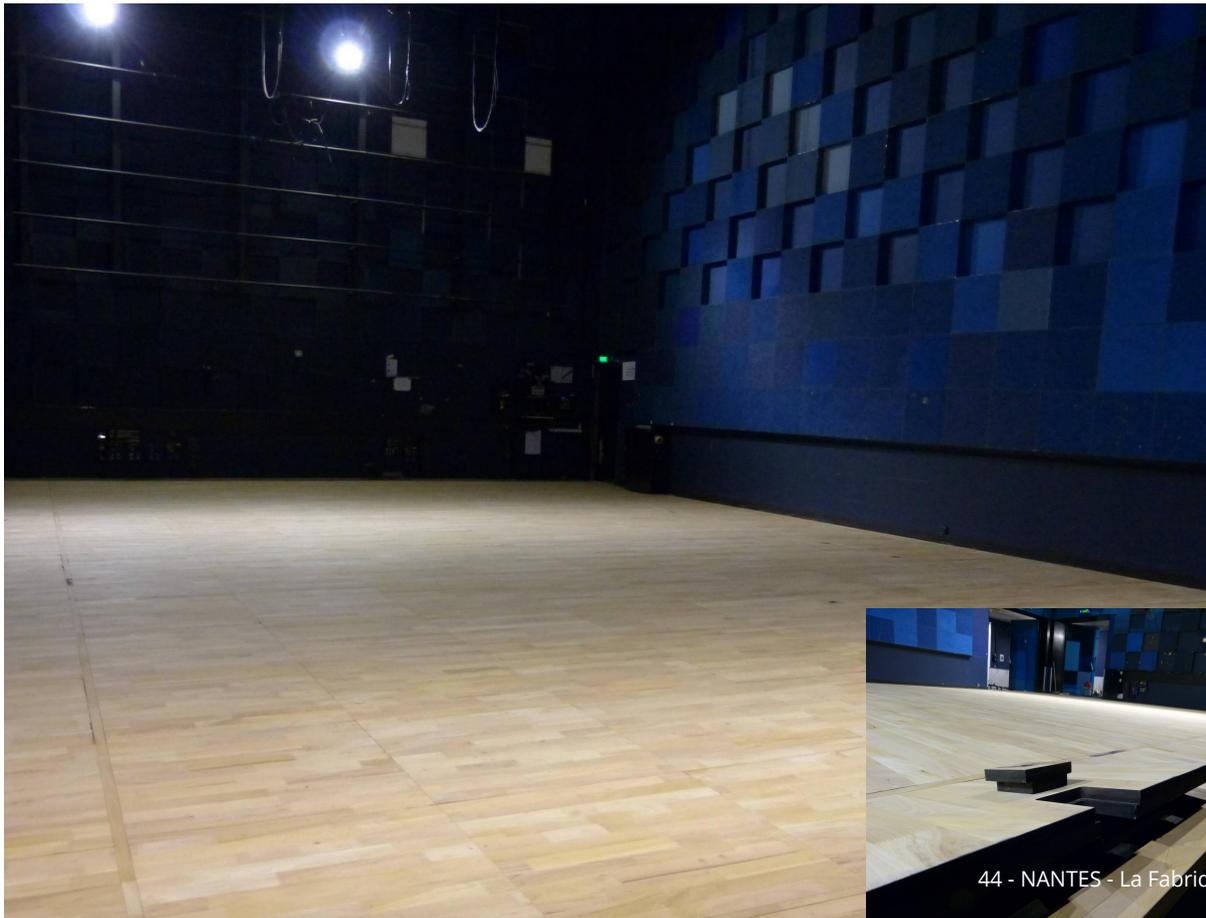

WOODCOTRAD floors are designed to meet the specific technical needs of stage and dance floors. They are hard wearing and offer sustainability.

Whether of softwood or hardwood, our floors are custom made to meet each venue's specific requirements.

The wood is dried to best settle in its new environment.

WOODCOTRAD wood floor can be left untreated, painted or oiled.

44 - NANTES - La Fabrique

3 AND 5 PLY SOLID WOOD PANELS

WOODCOPANEL

TECHNICAL FEATURES

Size

Up to 1200x1200mm

Species

Outside plies : hardwood or softwood
On demand
Inside plies : Spruce, or plywood

Number of plies

3-5-7 plies

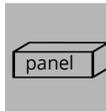

100 % massive

WOODCOPANEL is custom made. All solid wood plies are assembled crosswise for better stability. The wood dryness is pre-balanced to increase its performance.

WOODCOPANEL is either a 3, 5, 7 ply solid wood panel.

The external wood plies are made upon demand (thickness, species, grade...).

WOODCOPANEL is able to withstand heavy loads.

13 - MARSEILLE - La Friche Belle de Mai

DANCE AND STAGE FLOOR

WOODCOFLOOR

TECHNICAL FEATURES

Essence

Oak and Mahogany

**Meets the norm requirements
of NF EN-14904 Sols multisports
intérieurs**

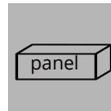

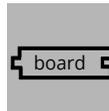

WOODCOFLOOR is a technical sprung floor made of solid tongue and groove boards nailed on a single or double batten system specially designed for dancers needs whilst also meeting the theatres requirements.

To perform to the highest standards, dancers rely on the highest quality floors to reduce the risks of injury and provide the best possible features.

WOODCOFLOOR has been designed to be shock absorbing, soft and with the right degree of grip.

The WOODCOFLOOR dynamics, its flexibility and its shock absorption are fundamental qualities for any dance floor.

WOODCOFLOOR is load resistant and adapted to retractable seating.

86 - POITIERS - Auditorium

LIT EDGES

WOODCOLIGHT

TECHNICAL FEATURES

Size

On demand

Species

Hardwood
Straight or curved

Pluggings

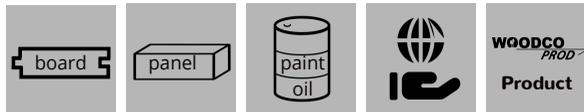

Harting
For new or renovated venues

The WOODCOLIGHT allows light markings of the front stage wooden edge.

The light beam is integrated in the wooden edge and can be rotating if necessary.

It is wired to the console to ease its use.

35 - RENNES - Couvent des Jacobins

DECORATIVE AND ACOUSTIC PANELS ACOUSTIC SHELLS

WOODCOSOUND

WOODCOSOUND panels are designed for decorative and for acoustic necessities of all types of venues.

They are custom made. They can be set in or removable, one sided or double sided for rotation.

As sound absorbing or acoustic diffusion solutions, their shape and performances are made upon request.

WOODCOSOUND panels are destined to improve the public and musicians acoustic confort in orchestra pits and tiers.

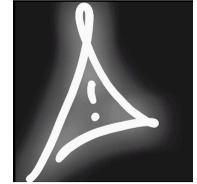

WOODCOSOUND panels can also be designed for acoustic shells.

13 - MARSEILLE - IMMS

FINISH / MAINTENANCE

Whether in a theater, an auditorium or a dance hall, the floor is an essential technical asset. Its maintenance frequency depends on its use.

Regular maintenance will contribute to a longer lasting floor.

At VTI Scenic Floors, we provide maintenance contracts on all wood floor types from cleaning, for a long lasting preservation.

60 - COMPIEGNE - Espace Jean Legendre

OUR COMMITMENT

VTI Scenic Floors chooses environmentally friendly supplies and processes to limit the impact on the resources of our planet. Our products are eco-certified.
